

# Commodity Asset Management

Commodity Asset Management (CAM) is a specialized industrial commodity focused asset manager. Jonathan M. Tulkoff is an original Founding Partner and the PM of Commodity Asset Management. Jonathan has over twenty years of experience in trading both physical commodities and the futures markets, with distinct expertise in ferrous metals. CAM invests in lesser covered, but still liquid, exchange traded industrial commodities, where it believes it has a distinct fundamental edge. CAM sources its alpha from proprietary relationships across the industrial commodities value chain, as well as alternative data. The firm manages approximately 80 million for institutional and high net worth investors.

Commodity Asset Management is a Commodity Trading Advisor in partnership with Attainable Alpha, LLC.
